

Industrial Molds Group Wishes You All a Happy New Year!

2015 was a great year for Industrial Molds Group as we added more technology and capacity in order to help our customers meet increasing quality requirements and timeline commitments. We also invested in upgrades and capacity at our sister company, Pyramid Plastics, an injection molding company located just five miles from Industrial Molds.

These investments include an all-electric Toshiba press (our 4th new press in the last 18 months), new LED lighting throughout the plant, and a new Micro-Vu vision system (with 900x magnification) as the cornerstone of our completely re-vamped quality lab. In

addition to offering high quality molding services to a myriad of customers, Pyramid also acts as a mold trial service for Industrial. Utilizing Pyramid's 30 presses, we are able to quickly and cost effectively validate our molds, so when they get to the customer, they are ready to produce quality parts on day one.

At Industrial Molds Group, we believe that an investment in our future is an investment in the future of our customers. Success doesn't come by accident; it's intentional and strategic.

Motivational speaker Tony Robbins once said, "Change is inevitable; progress is optional." In our industry there have been many changes - some good and some real challenges! We like to think that we were able to turn challenges into opportunities for success, and as a result have made much progress in our business this past year.

We want to thank each and every one of our customers who helped make Industrial Molds Group successful in 2015, and who will continue with us throughout 2016. We hope we have helped make your business better and your mold engineering experience easier. It's certainly been a pleasure to work with each of you and we look forward to helping you on your upcoming mold programs and continued success in 2016.

Sincerely,

Industrial Molds, Inc.
